Bryce Breedlove

System & Infrastructure Engineer II

Contact

Brycebreedlo@gmail.com

Objective

Skilled IT professional with Cisco Certified DevNet Associate certification, specializing in system administration for both Windows and Apple environments. Demonstrated expertise in resolving over 9,000 software and hardware issues and a proven track record in process improvement and team leadership. Eager to contribute innovative solutions and best practices in a software engineering role.

Education

College Coursework in Networking, Systems Analysis, programming, SQL

Key Skills

Advanced System Administration (Windows & Apple)

Software and Hardware Troubleshooting

Technical Documentation

PowerShell & Python Scripting

Experience

October 2021 – Present

Systems Engineer II • ADE TechSpot

- Participated in projects to build technical solutions for our operations from scratch, made use of GenAI tools to audit tickets, created MVPs for tools to speed up technician workflows, provided feedback on scripts being implemented by engineering teams.
- Demonstrated customer innovation by integrating hardware break-fix requirements into tech bar services, leading to improved customer outcomes and higher weekly ticket closure rates.
- Displayed leadership innovation by training teammates, introducing process improvements, and leading discussions with L2 and product teams for better customer experiences.
- Authored and shared troubleshooting documentation for elevated accounts, profile rebuilds, Root CA repairs, client network settings requirements and more.

June 2019 – October 2021

Technician V • Walmart ADE Onsite

- Migrate and deploy Windows and Apple systems, ensuring optimal system performance.

- Automated shipping label creation with Python scripts, interfacing with FedEx's API to produce thousands of labels per month for multiple teams in our pillar that shipped laptops, ipads and other hardware to new hires, Home Office and contact center associates.
